

Diamond

D/A Converter

Premium DAC with VOLTAiR technology

Diamond is the perfect DAC and preamplifier for everyone who plays music exclusively from digital sources. Diamond offers connectivity for six digital sources and an external word clock. The superior VOLTAiR technology, combined with the premium DAC including DLP120, delivers finest soundstages. The analog volume control allows for highest resolution – even at low volumes.

- VOLTAiR technology
- Six digital stereo inputs (1 x USB, 2x Coaxial, 2x Optical, 1x AES)
- Balanced and standard outputs
- Individually for both outputs: volume control or Direct Out
- Analog volume control with ALPS "Big Blue" potentiometer
- The source of the clock signal can be selected via the CLOCK switch
- Frequency response: 10 Hz to 300 kHz
- Distortion factor: 0.00992 %
- Dynamic range: 135 dB
- Thanks to Through-hole technology, the best sounding components can be used
- Manufactured in Niederkrüchten on the Lower Rhine, Germany
