

Electro

Analog Preamplifier

The analog purist

The Electro is the perfect preamplifier for the lover of pure analog technology. It features a total of six analog inputs. Three of which are balanced with XLR connectors. The Electro is equipped with the big remote controllable aluminum volume control with marker LED and two mechanical VU meters. External audio processors or analog tape machines can be looped in the Tape Monitor.

Thanks to the all superior VOLTAiR technology the Electro brings analog sources to new life.

- VOLTAiR technology
- Six analog stereo inputs (3 x balanced XLR and 3 x RCA)
- Balanced and standard outputs
- Direct Out
- "Tape Monitor" path (switchable)
- Analog volume control with motorized ALPS "Big Blue" potentiometer
- Remote volume control (IR)
- AMP CTL – 12 V trigger output
- Frequency response: 10 Hz to 200 kHz
- Distortion factor: 0.00992 %
- Dynamic range: 135 dB
- Thanks to Through-hole technology, the best sounding components can be used
- Manufactured in Niederkrüchten on the Lower Rhine, Germany
